Projects

Web Project – Teaching Assignment Management Application
Academic Project – ENSA Al Hoceima (2024/2025)

- Developed a full-stack web application using HTML, CSS, JavaScript, PHP, and MySQL, to manage teaching units within a university department.

UniEnroll — Microservices-Based Student Enrollment SystemUniEnroll

- Spring Boot · Spring Cloud · Eureka · WebClient · MySQL · HTML/JS
- Designed and implemented a distributed student enrollment system using 5 independent Spring Boot microservices with Eureka Service Discovery, 3 separate MySQL databases, and inter-service communication via WebClient.
- Applied real-world business rules: max 3 students per course and a 24-hour cancellation constraint.

E-Commerce CBIR – Visual Product Search

- Developed a Content-Based Image Retrieval (CBIR) web application that enables users to search for visually similar e-commerce products by uploading an image. Built a Flask backend with a React frontend, using a pre-trained ResNet50 model for feature extraction and FAISS for high-performance similarity search, with support for image and text search, filtering, and similarity scoring.
